The Summary Risk Indicator (SRI) is a guide to the level of risk of this product. It helps you assess risk and compare it with other products. It shows how likely it is that the product will lose money and whether the money you have invested has some form of protection.

The figure is based on 4 years of weekly performance data, where available. If 4 years of weekly data is not available for the Sub-Fund then the figure has been determined based on qualitative criteria limited to the nature of the product.

The risk indicator assumes you keep the product for the recommended holding period which can be found below. The risk can vary significantly if you cash in at a time, other than the end of the recommended holding period.

We have classified this Sub-Fund as 7 out of 7, which is high risk. The Sub-Fund may be exposed to risks not included in the SRI including, but not limited to, the following:

**Instrument risk:** The Sub-Fund invests in securities that may go up or down daily for a variety of reasons including changes in interest rates, inflation expectations, perceived credit quality of the issuer, perceived value of underlying instrument or positive or adverse news.

**Counterparty risk:** As the Sub-Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Sub-Fund, receiving less than is due or receiving nothing.

**Currency risk:** As the Sub-Fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

All Investment involves risk, and you may receive back less than your investment amount. This Sub-Fund offers no guarantee against loss or that the Sub-Fund's objective will be attained. For a comprehensive list of risk factors that may apply to the investment, please refer to the offering supplement of the Sub-Fund. Please note that the share class risk category is not guaranteed and may change from time to time.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended holding period (RHP): 5 years

The recommended holding period of 5 years has been selected for illustrative purposes only and must not be taken as a guarantee or an indication of future performance, return or risk levels. This Share Class is a back-end charging share class which carries with it an Authorized Distributor Fee (ADF) of 1% p.a. (range from 1%, up to 7%). The ADF is determined by a signed agreement between investor and authorized distributor provided at the time of subscription. It is then paid from the fund at subscription and clawed back at 1% p.a. of the initial investment amount. If you redeem prior to the full claw back of the ADF, a redemption penalty will apply equal to the outstanding balance. (e.g., 1% agreement = 1yr redemption penalty period, 7% agreement = 7yr redemption penalty period). If a 7% fee is agreed, then a 2% redemption penalty will apply at the end of the RHP.

The above-mentioned period has been defined in accordance with the product characteristics.
